RE: Olin Corp./McIntosh Superfund Site  
McIntosh, Alabama

Dear Mr. Brown:

In reference to our telephone conversation on Tuesday, May 11, 1993, this is to formally request submission of soil action levels for those areas that have been identified as continuing sources for ground water contamination. These levels are easily obtainable utilizing a ground water mathematical model. This information is crucial for EPA's review of the Draft Feasibility Study. Consequently, please provide this information within ten calendar days from receipt of this letter.

In addition, please be available for a conference call on May 19, 1993 at 10:00 a.m. to ensure that we are in agreement on the variables to utilize in your selected ground water model. I have scheduled utilization of EPA's teleconferencing facilities from 10:00 a.m. - 11:00 a.m. Please call (202)260-4255 for connection to the conference call.

Sincerely,

Cheryl W. Smith, RPM
